

MRF HTML5 Map Server Work Alone Safety Extension

The Work Alone Safety Extension for the MRF HTML5 Map Server provides industry best value with an extensive feature set and flexible configuration options.

Designed to Meet Your Work Alone Safety Policy

When it comes to mission critical objectives like worker safety, the solution should meet the policy, not the other way around.

- 🌐 Design and manage your own emergency escalation process
 - Choose your lone worker check-in interval
 - Set-up automated emergency notifications with customized escalation
- 🌐 Find and track your lone workers
 - Locate workers in emergency situations
 - Quantify non-business time of self-managed employees
- 🌐 Archive lone worker locations and activities
 - Prove where your lone workers were and where they weren't
 - Automated employee clock-in and clock-out
- 🌐 Trigger events and notifications when workers enter or leave a specific area
 - Notify supervisor when worker arrives on-site
 - Send emergency notifications when worker enters restricted areas

About MRF

Founded in 1992, we have helped thousands of organizations solve common to complex workflow, coordination, and information management problems using GIS software and systems integration.

We do this by dedicating ourselves first to understanding the issues you are experiencing and then applying innovative combinations of our comprehensive spatial technologies.
